

NL. Was- en reinigingsproducten zijn samengesteld uit vele ingrediënten. Bij een klein aantal mensen kan een bepaalde stof een irritatie- of allergische reactie veroorzaken. Als u weet waarvoor u gevoelig of allergisch bent, kan de lijst met ingrediënten u helpen deze stof te vermijden. Neem in geval van twijfel altijd contact op met uw arts.

Ingrediëntenlijsten op basis van INCI-naamgevingssysteem

De ingrediënten staan vermeld met de naam vermeld in de Europese standaard lijst INCI. Dit staat voor Internationale Nomenclatuur van Cosmetische Ingrediënten. Deze naamgeving is in heel Europa voor alle cosmetische producten hetzelfde en wordt bij uitslagen van allergie tests altijd aan de "patient" gegeven. De omschrijvingen zijn daardoor voor u als consument mogelijk iets moeilijker te lezen. Een voordeel is wel dat u elk product dat u koopt, waar ook in Europa, altijd kunt beoordelen.

De producten zijn gerangschikt op volgorde van het 8-cijferige Hema-artikelnummer dat u op elk product aantreft.

LET OP Dit artikelnummer is het unieke onderscheid en niet de productnaam.
